Volume 2, Issue 1

December 2004

POWER & TECHNOLOGY

What a machine! Wedge has just purchased a new measurement machine. A brand new Brown & Sharpe Gage 2000. We here at

Wedge never shy from a worthy reverse engineering challenge... but this gem will do it digitally for a fraction of the time. We are excited to add this equipment to our inspection staff. It is software driven and al-

lows for storage and recall of inspection operations. Gage 2000 allows shop personnel to perform 1, 2, and 3D measurement routines quickly and easily without the need for computer keyboard entries. What this means to you? The ability to have a precision inspection and approval of your parts prior to, during, and at the end of the production run. It will literally recognize your parts as easily as we do!

Our Holiday Wish:

We send wishes for the very best to you, your family and friends. May your holidays be magical. Be safe. Be extra nice. Enjoy the eggnog! Come back in 2005 for another great year!

DID YOU KNOW ? — WEDGE HAS A SISTER —

As a matter of fact, we have several sister companies. Combined we run the gamut when it comes to capabilities. MALIN COMPANY has been a part of our Cleveland family since 1884. They have provided quality wire and cable products to many industries including aerospace, medical, hardware and mill supply, catalog houses and more for over 100 years! Their operations include the ability to coil, spool, straighten & cut a variety of materials including aluminum, copper, brass, stainless and nickel based alloy wire. Malin can also provide you

with high quality cables in stainless steel or steel in a wide range of sizes and configurations. If you have the need, they will custom draw to your specifications, and of course "no quantity is too small". Malin has made a recent purchase of Brushes Corporation. This adds to their capabilities allowing production of quality twisted wire brushes. These wire brushes are provide in a variety of stem materials and fill materials. (216) 267-8092

Trivial Trivia!

~Coca-Cola only sold 25 bottles the first year. For a total of \$50: Supplies and advertising ran \$70. Ouch. Not really.

~A "JIFFY" is an actual unit of time for 1/100th of a second!

~Did you ever wonder what the WD in WD-40 stands for? The name was lifted right out chemist Norm Larsen's laboratory notebook. Way back in 1953, he was trying to concoct an anti-corrosion formula, which worked on the basic principle of displacing water. On his 40th try, Larsen finally got it right. Hence the name WD-40. It literally means Water Displacer, 40th try.

Introducing * Heather Swaney*

At this time we would like to introduce our newest employee: Heather Swaney. Heather joins our inside sales department. She brings expert computer skills. She

will be assisting you with all of your purchasing needs. With Heather's abilities, you will be pleased to work with her.

Welcome Aboard!

THANK YOU FOR A GREAT YEAR! MERRY CHRISTMAS!

Products Made Proudly in the U.S.A.
